EDUCATION & QUALIFICATIONS

- DIPLOMA IN FULL STACK WEB DEVELOPMENT
- DIPLOMA IN WEB DEVELOPMENT FUNDAMENTALS
- CYBER SECURITY CERTIFICATION

SUMMARY

Highly skilled Full Stack Web Developer with 3+ years of experience in MERN stack technologies. Proficient in JavaScript, Node.js, React, MongoDB, and REST APIs. Seeking a challenging role to leverage my expertise and drive team success.

SKILLS & TOOLS

- | | | |
|---------------------|-------------------------------|------------------------------|
| • HTML5 | • TypeScript | • PHPMyAdmin |
| • CSS3 | • Laravel | • Github CI/CD |
| • JavaScript (ES6+) | • MySQL | • Firebase |
| • ReactJS | • PostgreSQL | • Google Cloud |
| • JQuery | • Docker | • FileZilla |
| • NodeJS | • WordPress | • Flask |
| • ExpressJS | • Sequelize | • Android Studio |
| • MongoDB | • Linux | • Flutter Mobile Development |
| • GraphQL | • OpenAi Api | • XAMPP |
| • Git | • Java | • Sendgrid |
| • Github | • COBOL (Zlos IBM Mainframes) | • Native Android Development |
| • Redis | • Rust (Command Line, IOT) | • Twilio |
| • PHP | • Solidity | • Django |

EXPERIENCE

SEP 2025 - Present

Punch Group, Nigeria - Full Stack Developer (Full-time, On-Site)

- Developed a full-stack enterprise autodialer platform utilizing Node.js, TypeScript, and Express, anchored by a robust GraphQL architecture with Apollo Server.
- Integrated Twilio and Vonage APIs to facilitate real-time voice communications, SMS messaging, and AI-driven call automation workflows.
- Engineered a lead management system featuring WebSocket-based agent assignment, automated call queuing, IVR navigation with DTMF support, and dynamic routing based on agent availability.
- Incorporated OpenAI's GPT models to deliver real-time conversation assistance for agents and automated content generation for email and SMS campaigns.
- Built a scalable backend using MongoDB/Mongoose for data persistence, Redis and BullMQ for asynchronous job processing, and AWS S3/Cloudinary for secure media storage.
- Designed comprehensive RESTful and GraphQL APIs supporting over 34 resolvers to handle campaigns, communication logs, appointment scheduling, and real-time reporting.

APR 2025 - JUL 2025

PERZSI LLC, USA - MERN Stack Developer (Contract, Remote)

- Led a team of 3 developers in designing and developing a new internal product, accelerating project delivery and code quality.
- Set up GitHub CI/CD pipelines and server configuration for seamless testing and automated deployment.
- Designed and implemented dynamic data tables tailored to business requirements, enhancing data accessibility.
- Developed RESTful APIs with proper versioning, security best practices, and scalable structure.
- Translated design mockups directly from Figma to production UI, eliminating the need for additional design cycles and reducing costs.

MAY 2025 – JUN 2025

GN128 Solutions, Nigeria – Web Developer (Contract, On-site)

- Contributed to 3 active web projects, enhancing UI/UX, performance, and developer efficiency.
- Redesigned a major project's website and created reusable global components, streamlining development for other team members.
- Implemented PHP backends for 2 client-facing projects, supporting robust business logic and database interactions.
- Integrated frontend and backend systems for a complete project lifecycle, ensuring functional and responsive user experiences.
- Wrote comprehensive documentation for all work done, supporting future maintenance and onboarding.
- Set up CI/CD pipelines for all assigned projects, ensuring automated testing and reliable deployment.

MAR 2024 - JAN 2025

PERZSI LLC, USA - Fullstack PHP Developer

- Streamlined company operations by designing and launching a new Dashboard, enhancing data management efficiency.
- Created 5 new SQL tables to support dashboard functionality, reducing data retrieval time by 30%.
- Integrated 3 payment platforms, increasing payment processing speed by 25%.
- Successfully migrated the company's website backend from Node.js to Laravel, reducing server response time by 40%.

JAN 2023 - MAR 2024

JUMIA - Accountant and Clerk

- Streamlined financial operations by managing accounts payable and receivable, achieving 99.5% on-time payment rate to vendors and customers 100% accuracy in payment processing.
- Accelerated CRM data integrity by processing and updating 500+ customer records monthly and maintaining 95%+ data accuracy
- Expanded role as Hub Representative, successfully coordinating daily operations for 20+ staff members achieving 5% increase in hub efficiency through process improvements.

APR 2023 - DEC 2023

CALCULATE ALL, USA - Backend Developer

- Built an OCR API utilizing **Tesseract** and **pdfjs-dist**, enabling users to extract text from 500+ image and PDF file formats with 95%+ accuracy rate for scanned documents and 30% reduction in manual data entry time.
- Designed a scalable image management system using **Cloudinary's** Node.js SDK, leading to a 40% decrease in image storage costs and 3x increase in image querying speed.
- Developed a MongoDB database, achieving 99.9% uptime and data retrieval efficiency and 25% reduction in data storage costs.

2022 - 2023

GIGSHARE - FullStack Web Development Intern

- Enhanced website functionality with JavaScript, adding features that boosted user engagement by 25%.
- Developed and maintained RESTful APIs, ensuring 99.5% API uptime reliability and 30% reduction in API response time.
- Improved database performance by leveraging Mongoose's indexing and aggregation features, resulting in 40% decrease in database query time and 20% reduction in database load
